

PROOF SPRINT PLANNING ESTIMATE

Know the customer effort before work begins.

Planning ranges for one site, one CAPA or NCR workflow and approximately 250–1,000 usable historical records.

QUALITY LEAD**4-6 hours**

Scope the question, confirm the baseline and review the closeout across the 4–6 week sprint.

DATA OWNER**2-4 hours**

Export, map and confirm the approved historical records and source ownership.

NAMED REVIEWERS**2-3 people**

Normally 2–4 hours each to assess surfaced records and record Accept, Maybe or Reject.

ASSURANCE INPUT**Up to 60 min**

Security or procurement input where buyer due diligence is required before data exchange.

PLANNED MEETINGS**45 min**

Kick-off

30 min

Progress review

60 min

Closeout

MINIMUM USEFUL EXPORT

Record ID, event date, site or workflow, product or process, failure description, containment or corrective action, status and source reference. Cost and effectiveness fields improve the analysis when approved and available.

WHAT CHANGES THE ESTIMATE

Data remediation, additional sites, live integration, validation work, extra review groups or more than 1,000 records are confirmed and priced separately before work begins.

NEXT STEP

Use the free Quality History Assessment to confirm fit and replace these ranges with an agreed plan.
